-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on June 27, 2005
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in the reply filed on June 27, 2005 is acknowledged.
2. Claims 17 and 18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on June 27, 2005.

Claim Rejections - 35 USC § 112

3. Claims 3-11 and 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 3-11, there is no express antecedent basis for "said alkenyl group-containing compound".

In claims 8-11, it is unclear how "a" molar number limits the claimed subject matter.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 6,562,934 (Yonehama et al).

Art Unit: 1711

Yonehama et al disclose amino compounds obtained by addition reaction of a diamine component with an alkenyl compound, reading on the presently claimed unsaturated compound. The diamine can be mixed with other polyamino compounds, such as, polyoxyalkylenepolyamines, reading on the presently claimed polyoxyalkylene polyamine (column 3, line 54 – column 4, line 2). The amount of said other polyamino compound to be is preferably 1 part by weight or less per 1 part by weight of the diamine. The preferred alkenyl compound is styrene (column 4, line 17 and examples). The reaction proportion is usually 0.1 to 4 mol of alkenyl compound to 1 mol of diamine component (column 4, lines 25-39).

The disclosure of the reference differs in essence from the present claims in not expressly exemplifying the additional use of a polyoxyalkylene polyamine for reaction with the styrene or alkenyl compound. It is maintained that it would have been obvious to one having ordinary skill in the art to have used a polyoxyalkylene polyamine in combination with the diamine because the reference clearly states that a polyoxyalkylene polyamine can be mixed with the diamine as the diamine component. Accordingly, absent evidence of unusual or unexpected results, no patentability can be seen in the presently claimed subject matter.

Response to Amendments

6. Applicant's amendments filed June 27, 2005 have been fully considered and are effective to overcome the rejection based on EP '206.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ana L. Woodward whose telephone number is (571) 272-1082. The examiner can normally be reached on Monday-Friday (8:30-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James J. Seidleck can be reached on (571) 272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
